

PUBLIC CLIMATE REPORT

2023

Providence Capital N.V.

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Climate Report.

Climate change is recognised as a priority issue in the PRI's 2021-2024 Strategy and climate-specific indicators were introduced for the first time in the 2018 Reporting Framework. In the 2023 Reporting Framework, these indicators are aligned to the recommendations of the Task Force on Climate-Related Financial Disclosures and the Investor Climate Action Plans.

The public Climate Reports, which are produced using signatories' reported information, support signatories to have internal discussions about their climate-related practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Climate Report is an export of the signatory's responses to core climate-related indicators (and any plus indicators it has agreed to make public) in the PRI Reporting Framework from the 2023 reporting period.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Has your organisation identified climate-related risks and opportunities affecting your investments?

- ☐ (A) Yes, within our standard planning horizon
- ☐ (B) Yes, beyond our standard planning horizon
- ☒ **(C) No, we have not identified climate-related risks and/or opportunities affecting our investments**
Explain why:

The ESG-policy is based on the exclusion of companies in violation of the UN Global Compact.
No specific climate related risk and/or opportunities have been identified yet.
Currently, we are discussing a update of the ESG-policy including positive selection based on transition.
Specific climate risks and opportunities will then be identified.
